

Generational Change at SynoFin Risikomanagement Service AG

After 13 years, SynoFin is undergoing a generational change. The founder, **Günter Unterleitner**, will step back from day-to-day operations and will in future focus on strategic matters as Chairman of the Board of Directors, as well as on marketing and sales of the RiskMan product and service portfolio.

The Board of Directors will be strengthened by **Mr. Peter Thomayer**, who joins as a representative of the new core shareholder, CPB SOFTWARE AG, based in Vienna. He will contribute his extensive expertise in project management, finance and accounting, as well as IT services.

At the same time, **Mr. Dario Brander**, a long-standing SynoFin employee and the mastermind behind our RiskMan solution, joins the Executive Management, thereby ideally completing the generational transition. As of February 1, 2026, Mr. Dario Brander will be responsible within the Executive Management for risk management, software development and production, as well as project management. We owe a significant part of the development and expansion of SynoFin RiskMan to Mr. Brander and are pleased to now leverage his expertise and detailed customer knowledge at Executive Management level.

We are pleased to welcome Mr. Unterleitner, Mr. Thomayer, and Mr. Brander in their new roles at SynoFin and wish them every success together with their respective teams.

Our **Board of Directors** effective 01 February 2026:

Dr. Günter Unterleitner

Matthias Biedenkapp

Peter Thomayer

Our **Executive Management** effective 01 February 2026:

Dr. Beatrix Jäger

Dario Brander

Our commitment to service remains unchanged in this new formation!
If you have any questions or concerns, we're always happy to assist.

Effektiv mit System.
